THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

- 25X1 1. The Soviet Signal Service Centre is said to be located at Jászberény, in a villa four kilometers north of the city and about 250 meters west of the road from Jászberény to Jászárokszállás. This is the point of departure of the heavy cable leading directly to Moscow. The cable is carried above ground from Jászberény along the railroad line as far as Hatvan, then continues along the Budapest-Miskolc rail line, from Miskolc by way of Felsőlőzsolca and along the railroad through Hidasnémeti, after which it enters Czechoslovak territory. The cable is of heavy "transcontinental" construction, and contains 24 lines.
2. From Budapest to Székesfehérvár, Pápa, and Szombathely there is an overhead line, generally following the highway, for Soviet teletype communications. Aside from this, the Russians in western Hungary mostly use the lines belonging to the Hungarian Post Office.
3. Soviet radio transmitters are located at the following places:
- Székesfehérvár, in the cavalry barracks
Szombathely, in the barracks on Zanati ut
Pápa, in the castle
Hajmáskér, at the training field
